CITRINE
CONSULTING

Launch faster. Scale smarter. Deliver with confidence.

We design, integrate, and deliver robust digital platforms that power broadcasters, telcos, operators, and enterprise technology providers — end-to-end, from concept to deployment.

About Us

Based in Johannesburg, Citrine Consulting partners with broadcasters, telcos, media organisations, and ERP providers to deliver scalable technology solutions that enable growth, resilience, and innovation.

Our approach blends deep technical delivery experience with strategic insight — ensuring that every engagement leads to measurable outcomes, improved adoption, and reduced operational risk.

We specialise in operator-grade platforms, ERP systems, system integration, and digital transformation initiatives, supporting clients through every stage of delivery — from concept to live operation.

With a strong track record across Set-Top-Boxes, Smart Devices, Middleware, Apps, UI/UX, Certification, ERP, Cloud Infrastructure, and operator ecosystems, Citrine Consulting continues to empower global technology providers to launch faster, perform reliably, and evolve with confidence.

Core Services

Programme & Project Management

Governance, planning, and cross-functional leadership to deliver every project on time and on budget.

System Integration

End-to-end integrations across streaming platforms, billing systems,and operator stacks.

Product Development

Product-led builds with iterative releases, telemetry, and continuous improvement to align solutions with evolving business needs

Technology Strategy & Roadmapping

Clear technology paths that align IT with business goals and enable scalable, future-ready systems.

End-to-end Technology Delivery servicces

Complete delivery from design to deployment, ensuring every platform operates reliably and delivers measurable value.

We deliver complex technology projects with precision, transparency, and measurable outcomes.
Our multidisciplinary approach combines strategy, delivery, and integration — ensuring every solution works reliably from day one.

Why Choose Us?

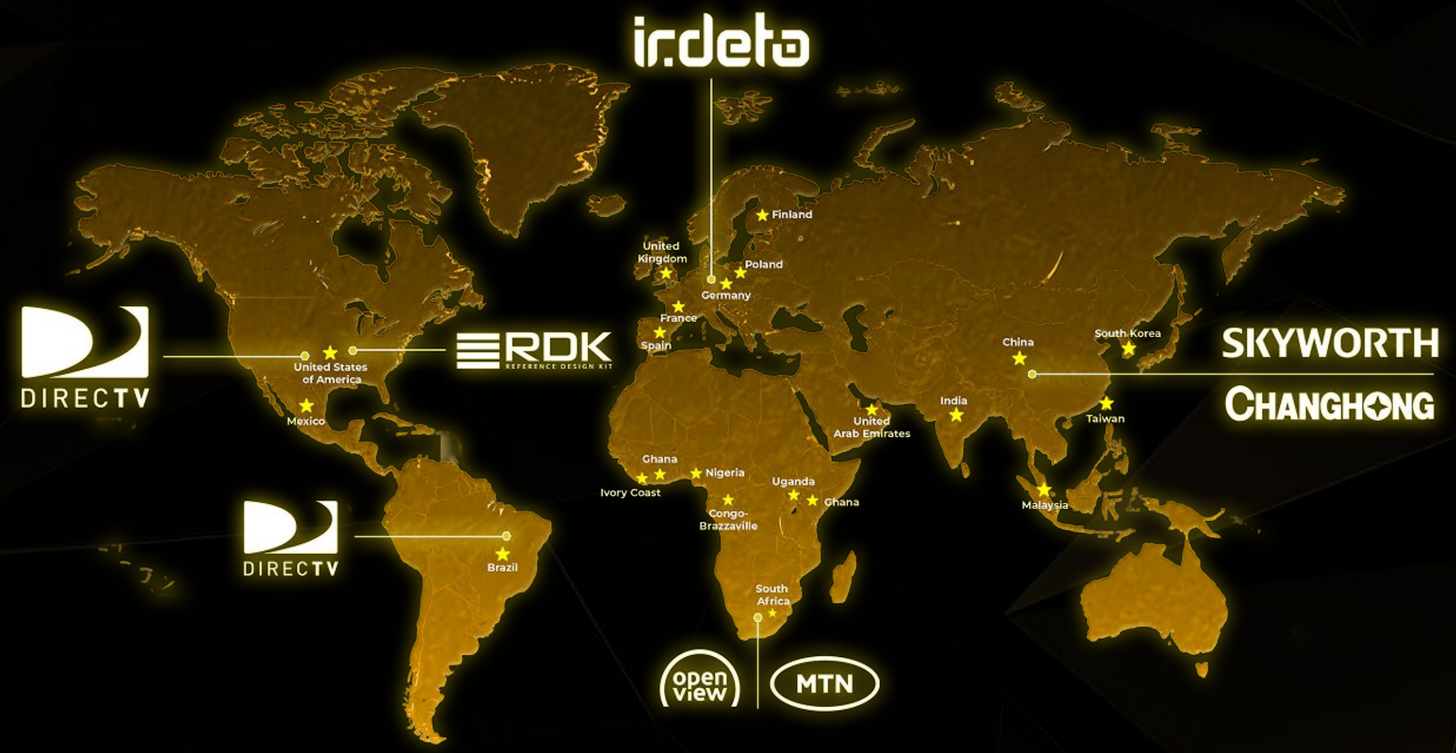
- Industry Expertise
- Proven Track Record
- Client-Centric Focus
- Innovation-Driven Approach

Our Approach

1. Immersive Discovery
2. Collaborative Strategy Development
3. Agile Implementation Focus
4. Customized Training & Change Management

Our Global Footprint

We have supported clients across Africa and globally, providing system integration, platform builds, and digital transformation services that accelerate time-to-market and reduce operational risk. Our clients trust us!



Integrations & Deliveries

Trusted by industry-leading OEMs, SoC vendors, and platform providers, we deliver integrated solutions that work flawlessly across broadcast, streaming, and enterprise environments

Middleware Vendors

SOFIA DIGITAL
TiVo
HbbTV
androidtv

Streaming Services

tv

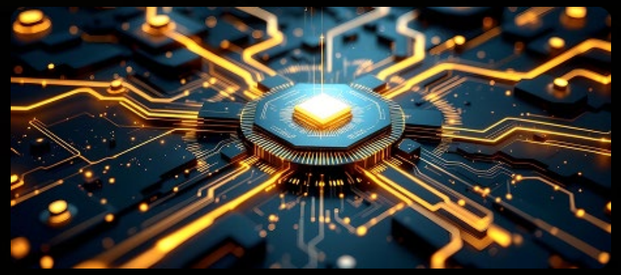
BROADCOM
Qualcomm

Client Success Stories

Accelerating Digital Transformation for a Tier-1 Telecom Operator

Helped a Tier-1 telecom operator deploy video services with BSS and OSS integration 30% quicker, enhancing performance across multiple regions



Integrating Global Streaming Platforms Across Multi-Operator Ecosystems

Led end-to-end integration of international streaming platforms across diverse operator environments, connecting CRM, billing, and middleware systems. Operators now deliver a frictionless content experience and expand customer engagement efficiently.

Cloud Migration Strategy for a Major Broadcaster

Executed a cloud migration strategy with full integration of critical streaming and backend systems. Streamlined operations, enhanced platform performance, and enabled scalable service delivery.
